*Digital Competence is defined as the set of skills, knowledge and attitudes that enable the confident, creative and critical use of digital technologies to enhance teaching, learning and assessment.*  
(Digital Learning Framework for Post-Primary Schools)

This framework for developing a Plan for Enhancing Staff Digital Competency has been compiled as a resource pack to support ETB schools and colleges and should form **part of** the overall Digital Learning Plan for the school.

It specifically aims to support school leaders in identifying the digital hardware and skills requirements of teachers in pursuance of the implementation of a responsive Digital Teaching, Learning and Assessment Strategy, as required by the *Digital Strategy for Schools 2015 - 2020*

<https://www.education.ie/en/Publications/Policy-Reports/Digital-Strategy-forSchools-2015-2020.pdf>

The process, outlined in this resource, has been designed in a way that facilitates the voice of school management, teachers and students in influencing the development of a meaningful framework of support for teachers in the development of their digital teaching skills.

This framework document is designed to align with the School Self Evaluation Process.

| School Self Evaluation Process  |   | Digital Competency Framework  |
|---|---|---|
|  | Identify Focus                              | <b>Stage 1 &amp; 2:</b> Initial communication with staff and pre-planning |
|   | Gather evidence                             | <b>Stage 3:</b> Data gathering  |
|   | Analyse and make judgements                 | <b>Stage 4:</b> Action planning   |
|   | Write and share report and improvement plan |   |
|   | Put improvement plan into action            | <b>Stage 5:</b> Implementation  |
|   | Monitor actions and evaluate impact         | <b>Stage 6:</b> Review and evaluation                                     |

This framework document was developed in response to feedback from our schools in relation to digital learning and their experiences of teaching and learning through COVID 19.

We hope that it will be of assistance

### 3. Action & Implementation Planning:

#### We are going to focus on how to improve our digital competency needs by:

The development of teacher skills, knowledge and attitudes that enable the confident, creative and critical use of digital technologies to enhance teaching, learning and assessment by:

- a. Identifying digital learning opportunities for staff
- b. Developing and implementing a schedule for Professional Learning

A range of opportunities will be explored and included in the proposed schedule, which could include some or all of the following:

- Self-directed learning
- Inter-departmental upskilling
- At whole-school level
- Identify external agencies to provide learning opportunities at school level

#### Our Plan to enhance Staff Digital Competency 2020/21

On the next page we have recorded:

- The **targets** for improvement we have set
- The **actions** we will implement to achieve these
- **Who is responsible** for implementing, monitoring and reviewing our improvement plan
- How we will measure **progress** and check **outcomes** (criteria for success)
